

Phuwadech Panichayasopa (Aof)

Full-Stack Web Developer

Available to start now

Military service completed (Nov 2026)

PROFILE

Full-stack web developer with 2+ years of professional experience building internal business systems with **React, Laravel and PostgreSQL**. Comfortable across the stack — database design, APIs and front-end — through to deploying on Windows Server and Ubuntu Server, with cloud storage on AWS S3 and Cloudflare R2.

FEATURED WORK

Omni-channel chat platform

callcenter-pk.pumpkin-th.com

Brings Lazada, Shopee, Facebook and LINE customer chats into one real-time inbox via webhooks and WebSocket, with response reports for KPI reviews, an FAQ bot, and a machine-learning model (scikit-learn) that screens images customers send.

`React · Laravel · PostgreSQL · MySQL · WebSocket · scikit-learn`

Service center system

service-center.pumpkin-th.com

Repair requests, repair history, reports and spare-parts ordering from product diagrams — all in one system.

`React · Laravel (Inertia) · PostgreSQL · MySQL`

EXPERIENCE

Web Developer Intern · Big Data Agency, Chiang Mai

2022 – 2023

- Built a **leave management system** with the team — leave requests, substitute requests, multi-step approval, and HR tools for leave balances and approval delegation.

`React · Laravel · PostgreSQL`

Programmer · Pumpkin Corporation Co., Ltd.

2023 – 2025

- Built the **omni-channel chat platform** and the **service center system** (see Featured work).
- Developed an **AI image-screening model** with Python + scikit-learn, working with the chat platform to flag greeting images and 18+ content.
- Built an automated monthly **QC incentive** calculator and a **product warranty registration** system on WordPress plus a React + Laravel site for neighboring-country customers.

`React · Laravel · Inertia · PostgreSQL · MySQL · Python · WordPress`

PERSONAL PROJECTS

MacHub — `Swift`

macOS menu-bar utility: battery charge limiter, clipboard history, RAM & temperature monitor, keyboard-cleaning lock, color picker.

github.com/ozoneaik/MacHub_project

Stock management system — `Next.js · Prisma · TiDB`

Inventory management for my family's business, in daily use on Vercel.
